

## **SITE BUILT TRASH CONTAINERS**

**Site built trash containers will be allowed on construction sites provided they comply with the following requirements;**

- 1. They must be constructed of minimum  $\frac{3}{4}$ " plywood and 2x4 framing.**
- 2. They must be a minimum of six (6) feet wide, four (4) feet tall and four (4) feet deep with a sturdy lid that can be secured shut.**
- 3. They must be maintained in good repair.**
- 4. If trash trailers are to be used as the on-site container they must meet the above minimum dimensions, be maintained in good repair and currently licensed for use on the highways.**
- 5. All trash within the trailer must be kept securely covered and contained within the trailer both on the jobsite and during transport to the proper trash collection facility.**
